Searching for a

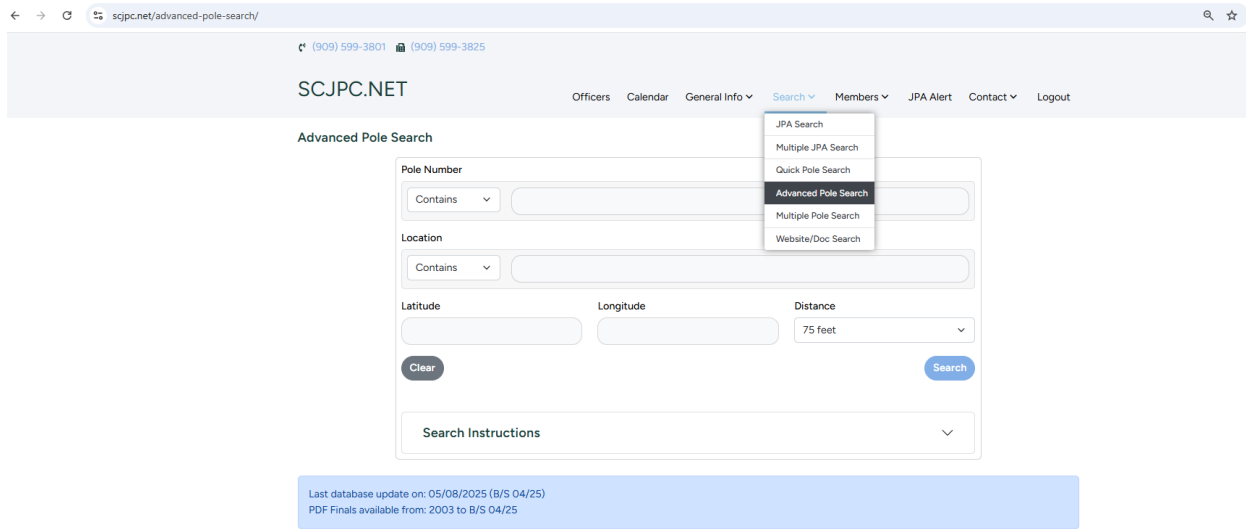

Dead Record

on the

SCJPC Website!

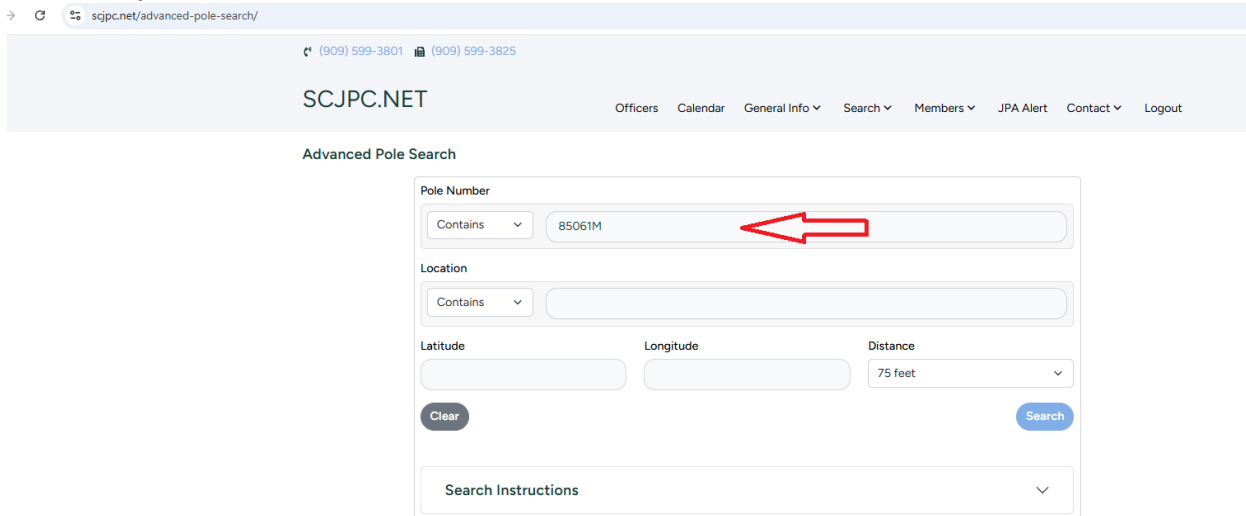

Searching for a Dead Record on the SCJPC Website!

Visit scjpc.net, click 'Search,' then select 'Advanced Pole Search.'

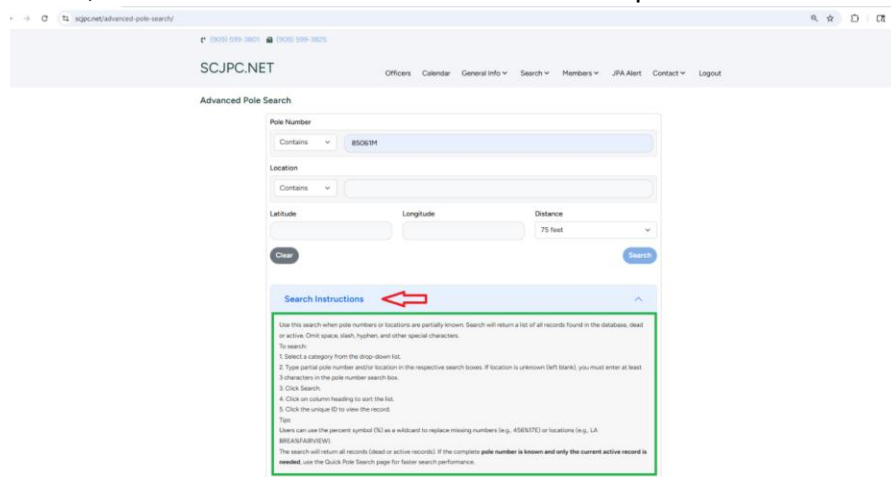

The screenshot shows the SCJPC.NET website's Advanced Pole Search page. The browser address bar displays scjpc.net/advanced-pole-search/. The website header includes the SCJPC.NET logo and navigation links: Officers, Calendar, General Info, Search, Members, JPA Alert, Contact, and Logout. The Search dropdown menu is open, showing options: JPA Search, Multiple JPA Search, Quick Pole Search, **Advanced Pole Search** (highlighted), Multiple Pole Search, and Website/Doc Search. The search form includes fields for Pole Number (with a 'Contains' dropdown), Location (with a 'Contains' dropdown), Latitude, Longitude, and Distance (set to 75 feet). There are 'Clear' and 'Search' buttons. A 'Search Instructions' box is at the bottom. A blue banner at the bottom of the page states: 'Last database update on: 05/08/2025 (B/S 04/25) PDF Finals available from: 2003 to B/S 04/25'.

Enter the pole number in the designated pole number field. Do not include any spaces, slashes, hyphens, or other special characters.

This screenshot shows the same SCJPC.NET Advanced Pole Search page. The 'Pole Number' field is now filled with the text '85061M'. A red arrow points to this field. The 'Search' button is highlighted in blue. The 'Search Instructions' box is expanded, showing a list of instructions for using the search form.

Note: For full instructions, click the 'Search Instructions' box to expand the tab.

This screenshot shows the SCJPC.NET Advanced Pole Search page with the 'Search Instructions' box expanded. A red arrow points to the 'Search Instructions' tab. The instructions are as follows:

Use this search when pole numbers or locations are partially known. Search will return a list of all records found in the database, dead or active. Omit space, slash, hyphens, and other special characters.

To search:

1. Select a category from the drop-down list.
2. Type partial pole number and/or location in the respective search boxes. If location is unknown (left blank), you must enter at least 3 characters in the pole number search box.
3. Click Search.
4. Click on column heading to sort the list.
5. Click the unique ID to view the record.

Tip:
Users can use the percent symbol (%) as a wildcard to replace missing numbers (e.g., 45637%) or locations (e.g., LA 650434%APRIVES).

The search will return all records (dead or active records). If the complete pole number is known and only the current active record is needed, use the Quick Pole Search page for faster search performance.

Then click Search.
