

How to Use the Multiple JPA Search

Web page: <https://scjpc.net/multiple-jpa-search/>

1. Enter the JPA numbers you wish to search into an Excel spreadsheet.
 - Do not include spaces, slashes, hyphens, or other special characters.
 - SCJPC does not include revision numbers (for example, REV#, R01, R02).
 - Example: Enter ABC1256NN12 instead of ABC-1256/NN-12.
2. Ensure the Excel file contains only JPA numbers.
 - Do not include additional data or extra columns, as this may affect search accuracy.

	A	B
1	JPA Number	
2	E60730800	
3	E60730801	
4	E60730802	
5	E60730804	
6	E60730805	
7	E60730806	
8	E60730807	
9	E60730808	
10	E60730810	

3. Check the box “Does Excel contains Header?” if your Excel file includes a header row (for example, “JPA Number”).
4. Click **Choose File** to upload your Excel spreadsheet, then click **Search**.
5. Once the search is complete, you may export the results to an Excel or CSV file, or print the results.
